Subject Index of Volume 4

Alloying
electron beam cladding and alloying of AISI 316 on plain carbon steel: microstructure and electrochemical corrosion behaviour, 317

Carbon
calculations on ion-assisted deposition techniques examined in relation to the deposition of diamond-like carbon coatings, 361
Carbon powders
interaction of carbon material with metallized coating, 301
Carbonaceous films
tribology of carbonaceous films formed by ion-beam-assisted deposition of organic material, 233
Carbonitride coatings
characterization of chromium nitride and carbonitride coatings deposited at low temperature by organometallic chemical vapour deposition, 275
Chemical vapour deposition
characterization of chromium nitride and carbonitride coatings deposited at low temperature by organometallic chemical vapour deposition, 275
Chromium nitride coatings
characterization of chromium nitride and carbonitride coatings deposited at low temperature by organometallic chemical vapour deposition, 275
Cladding
electron beam cladding and alloying of AISI 316 on plain carbon steel: microstructure and electrochemical corrosion behaviour, 317
Cooling rates
cooling rate effects on the tetragonal to monoclinic phase transformation in aged plasma-sprayed yttria partially stabilized zirconia, 289
Corrosion
corrosion performance of ion-plated titanium and yttrium-modified TiN coatings, 307
electron beam treatment of detonation-sprayed stellite coatings, 255

Deposition techniques
calculations on ion-assisted deposition techniques examined in relation to the deposition of diamond-like carbon coatings, 361

Electrochemical corrosion
electron beam cladding and alloying of AISI 316 on plain carbon steel: microstructure and electrochemical corrosion behaviour, 317
Electron beam treatment
electron beam treatment of detonation-sprayed stellite coatings, 255

Galvanized coatings
characterization of high temperature hot dip galvanized coatings, 245

Hard coatings
on the origin of compressive stress in PVD coatings—an explicative model, 265
Hot dip galvanizing
characterization of high temperature hot dip galvanized coatings, 245

Ion plating
corrosion performance of ion-plated titanium and yttrium-modified TiN coatings, 307
Ion-assisted deposition
calculations on ion-assisted deposition techniques examined in relation to the deposition of diamond-like carbon coatings, 361
Ion-beam-assisted deposition
tribology of carbonaceous films formed by ion-beam-assisted deposition of organic material, 233
Ion beam enhanced deposition
properties and structure of silicon nitride films synthesized by ion beam enhanced deposition, 227

Elsevier Sequoia, Lausanne

Metallized coatings
interaction of carbon material with metallized coating, 301
Microhardness
electron beam treatment of detonation-sprayed stellite coatings, 255
Microstructure
electron beam cladding and alloying of AISI 316 on plain carbon steel: microstructure and electrochemical corrosion behaviour, 317
Molybdenum
interaction of carbon material with metallized coating, 301

Oxidation
mechano-chemical approach to the oxidation of zircaloy–4, 347

Phase transformation
cooling rate effects on the tetragonal to monoclinic phase transformation in aged plasma-sprayed yttria partially stabilized zirconia, 289
Plasma vapor deposition
on the origin of compressive stress in PVD coatings - an explicative model, 265
Plasma-spraying
cooling rate effects on the tetragonal to monoclinic phase transformation in aged plasma-sprayed yttria partially stabilized zirconia, 289
scratch adhesion testing of plasma-sprayed yttria-stabilized zirconia coatings, 331

Scratch adhesion
scratch adhesion testing of plasma-sprayed yttria-stabilized zirconia coatings, 331
Silicon nitride films
properties and structure of silicon nitride films synthesized by ion beam enhanced deposition, 227
Sputtering
deposition of TiN films with titanium interlayer on low carbon steel by reactive r.f. magnetron sputtering, 371
Steel
deposition of TiN films with titanium interlayer on low carbon steel by reactive r.f. magnetron sputtering, 371
electron beam cladding and alloying of AISI 316 on plain carbon steel: microstructure and electrochemical corrosion behaviour, 317
Steels
characterization of high temperature hot dip galvanized coatings, 245
Stellite coatings
electron beam treatment of detonation-sprayed stellite coatings, 255
Stress
on the origin of compressive stress in PVD coatings—an explicative model, 265

TiN coatings
corrosion performance of ion-plated titanium and yttrium-modified TiN coatings, 307
TiN films
deposition of TiN films with titanium interlayer on low carbon steel by reactive r.f. magnetron sputtering, 371
Titanium
corrosion performance of ion-plated titanium and yttrium-modified TiN coatings, 307
interaction of carbon material with metallized coatings, 301

Zircaloy–4
mechano–chemical approach to the oxidation of zircaloy–4, 347
Zirconia
cooling rate effects on the tetragonal to monoclinic phase transformation in aged plasma-sprayed yttria partially stabilized zirconia, 289
scratch adhesion testing of plasma-sprayed yttria-stabilized zirconia coatings, 331
